## PROFILE

---

Highly enthusiastic Junior Developer, with skill in designing and developing various kinds of software applications and enterprise information systems. An energetic self-starter with strong communication skills, who possess proficiency with databases (SQL), object-oriented programming and agile practices.

## HIGHLIGHTS OF QUALIFICATIONS

---

- An achievement-oriented student of Software Engineering Technology Advanced Diploma program at Centennial College with high energy, flexibility and commitment to continuous learning
- Proven skills in technical problem-solving, troubleshooting and critical thinking skills
- Knowledgeable of user-oriented interface design, data management tools, and software security
- Strong communication skills and proficiency in English, Gujarati & Hindi; effectively communicates technical information to both technical and non-technical users

## TECHNICAL SKILLS

---

<b>Languages:</b>	C#, Java, Shell Scripting, Python
<b>Web Development:</b>	JavaScript, HTML/XML, CSS
<b>Databases:</b>	MySQL, Oracle SQL Developer
<b>Applications:</b>	MS Office Suite, MS Visual Studio, VS Code, MS Visio, GitHub, Jira

## EDUCATION

---

<b>Software Engineering Technology (Co-op) Advanced Diploma</b>	<b>Sept 2022 - Present</b>
Centennial College, Toronto, ON	

<i>Focus:</i> Web Interface Design	Client-Side Web Development	Database Concepts
Software Systems Design	Software Requirements Engineering	Java Programming
Unix/Linux OS	Web Application Development	Testing & Quality Assurance

## ACADEMIC PROJECTS

---

### Web Design – C#, HTML, CSS, JavaScript

- Designed a user-oriented, responsive weather application with dynamic features, utilizing weather APIs and implementing concepts such as the fetch API and async/await
- Used HTML and CSS to publish high-quality web documents that observe widely accepted design guidelines, and enable web documents to share business data using XML
- Built a social media function which generates name tag using object-oriented programming and DOM Manipulation using JavaScript, HTML and CSS technologies

### Software Requirements Specification (SRS)

- Collaborated for the planning SRS document for a mobile app that matches students to the suitable scholarships available on online platforms for higher education studies
- Use Agile methodology within a team
- Build analysis models which include scenario-based, class-based and behavioral-based models using both textual and graphical diagrams (UML standards)

- Applied object-oriented analysis principles, user experience design, domain analysis model, analysis patterns, quality assurance and technical review at the level of the requirements model
